

Assignment -1

Name: - Aditya Ingale

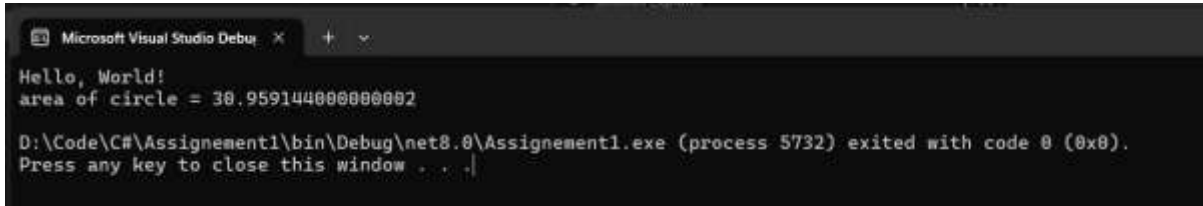

Roll no. : - 260250320005

1. Write a C# program to calculate "area of circle" based on the given "radius" value. Note radius is 3.14

```
Console.WriteLine("Hello, World!");

double radius = 3.14;
double pi = 3.14;
double area = pi * radius * radius;

Console.WriteLine("area of circle = " + area)
```

A screenshot of a Microsoft Visual Studio Debug console window. The output shows "Hello, World!" followed by "area of circle = 30.959144000000002". At the bottom, it says "D:\Code\C#\Assignment1\bin\Debug\net8.0\Assignment1.exe (process 5732) exited with code 0 (0x0). Press any key to close this window . . .".

```
Microsoft Visual Studio Debug
Hello, World!
area of circle = 30.959144000000002
D:\Code\C#\Assignment1\bin\Debug\net8.0\Assignment1.exe (process 5732) exited with code 0 (0x0).
Press any key to close this window . . .
```

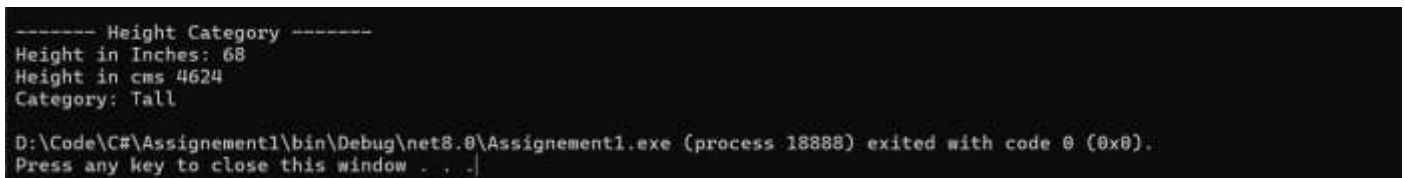

2. Write a program to find out "category of height" based on the given height of a person (in inches), using "if". **Note:** 1 inch = 2.54 centimeter You need to convert the input value (inches) into centimeters.

```
Console.WriteLine("----- Height Category -----");

double heightInInches = 68;
double heightInCms = heightInInches * 2.54;

Console.WriteLine("Height in Inches: " + heightInInches);
Console.WriteLine("Height in cms " + heightInCms);

if(heightInCms < 150)
{
    Console.WriteLine("Category: short");
}
else if(heightInCms <= 170)
{
    Console.WriteLine("Category: Average");
}
else
{
    Console.WriteLine("Category: Tall");
}
```

A screenshot of a console window showing the output of a C# program. The output displays "----- Height Category -----", "Height in Inches: 68", "Height in cms 172.72", and "Category: Tall". At the bottom, it says "D:\Code\C#\Assignment1\bin\Debug\net8.0\Assignment1.exe (process 18888) exited with code 0 (0x0). Press any key to close this window . . .".

```
----- Height Category -----
Height in Inches: 68
Height in cms 172.72
Category: Tall
D:\Code\C#\Assignment1\bin\Debug\net8.0\Assignment1.exe (process 18888) exited with code 0 (0x0).
Press any key to close this window . . .
```

3. Write a C# program to get nearest thousands of given integer number. Here, let name the input value as "number".

```
Console.WriteLine("----- Nearest Thousand -----");

int number = 4567;
double divided = number / 1000.0;
double roundedValue = Math.Round(divided);
int nearestThousand = (int)(roundedValue * 1000);

Console.WriteLine("Give Number : " + number);
Console.WriteLine("Nearest THousand: " + nearestThousand);
```

```
----- Nearest Thousand -----
Give Number : 4567
Nearest THousand: 5000

D:\Code\C#\Assignment1\bin\Debug\net8.0\Assignment1.exe (process 19260) exited with code 0 (0x0).
Press any key to close this window . . .|
```

4. Write a C# program to print the number of years, days, hours, minutes, seconds - based on given number of seconds. Without using if condition or loops

```
Console.WriteLine("---- Time Breakdown ----");

long totalSeconds = 100000000; // try changing this

long secondsInMinute = 60;
long secondsInHour = 60 * secondsInMinute; // 3600
long secondsInDay = 24 * secondsInHour; // 86400
long secondsInYear = 365 * secondsInDay; // 31536000

long years = totalSeconds / secondsInYear;
long remainderAfterYears = totalSeconds % secondsInYear;

long days = remainderAfterYears / secondsInDay;
long remainderAfterDays = remainderAfterYears % secondsInDay;

long hours = remainderAfterDays / secondsInHour;
long remainderAfterHours = remainderAfterDays % secondsInHour;

long minutes = remainderAfterHours / secondsInMinute;
long seconds = remainderAfterHours % secondsInMinute;

Console.WriteLine("Total seconds: " + totalSeconds);
Console.WriteLine("Years: " + years);
Console.WriteLine("Days: " + days);
Console.WriteLine("Hours: " + hours);
Console.WriteLine("Minutes: " + minutes);
Console.WriteLine("Seconds: " + seconds);
```

```
---- Time Breakdown ----
Total seconds: 100000000
Years: 3
Days: 62
Hours: 9
Minutes: 46
Seconds: 40

D:\Code\C#\Assignment1\bin\Debug\net8.0\Assignment1.exe (process 11932) exited with code 0 (0x0).
Press any key to close this window . . .|
```
